Martini-Henry breech-loading

Presented to both Houses of Parliament by Command of Her Majesty. [C. 299, page 4.] "The powder first tried by the Committee in the Sexer-Henry cartridge, and of which they entirely approve, is know as Curtis and Harrey, No.6." Several other descriptions manufactured at the Government Factory, Waitham Abbey, bare also been tried, but have not

forded the same uniform accuracy of shooting. afforced the same uniform accuracy of shoot ng.
There appear to be difficulties, confined, it is believed,
to the question of extense, in predacing a powder at
Watham Abbey in all resp ets equal to "Orrite and Harvey, No 6," but the Committee, keeping in view the impostance of maintaining the great accuracy of shooting
of the Martin-Henry rifle, resimmend that not powder should be used for its ammunition that foes not give results at least equal to those obtained, in the Com-mittee's experiments, whether such powder be obtained from the Government Factory or from the trade.

• Mesars Curtis and Harvey's powder was employed by Mr Henry during the competition for accuracy of abouting and the results then attained were satisfactory, the 'omn thee have, without making trial of the pair of other manufacturers, continued its use, as a standard.

CURTIS & HARVEY take this opportunity of renducian extract from the Bennet of the Special Committee on the most autable rides for the Service : and as TIBER GUNCOVERRE to be lightly commended they think it desirable to common sheate the into-mation to their customers and friends. The recommendation equally applies to all marks and descriptions.

my161kw New Westminster, Hon. Secretary.

English Mair Summary

TIOOTODATES TO MAY 19th. The petition against Mr Gwynne Holford, the Conservative member for Brecon, was heard by Mr Justice Lush. The main allegation set us by the petitioners was that Mrs Holford, the mother of the member, had given an enter-ainmost to some of the voters after the election; and it was sought to show the election; and it was sought to show that it was a corrupt freating? within the words of the statute. The judge decided that it was not, and he decimes ed the petition, with costs. A French dwarf now being exhibited in the Burlington Gallery is nine years old, measures scarcely nineteen inches in height and weight plat six pounds. A general dictary scale is in preparation by the Poorslaw Board, which will be uniformly imposed upon the whole of the metropolitan workhouses. A publie meeting was held in the city of London to express sympathy with and raise a tund for the relief of suffers by the apidemic now raging at Buenos Ayres. The Tichborne case is proceeding, and

there is every probability that it will not be concluded for several weeks to come. Simultaneously with the intelli-gence of the safety of Dr Livingstone comes the news of the reported death of Captain Faulkner, who was prominent in the efforts to discover the long-lost explorer. Little doubt exists that the gallant captain has been killed in Africa. Mr Gladstone has incidentally announced that the amendments introduced by Lord Salisbury into the University Tests Bill will be opposed by the Government. A Land Tenure Reform League has been formed under the auspics of Mr J S Mill, which proposes to substitute State ownership for individual rights, with compensation to existing bolders. Dr Letheby has reported that an immense quantity of superious and unsound tea has been publicly sold in London for rotailing in country districts. London for retailing in country districts. A petition signed by 28 Austrian Archbishops and Bishops, has been presented to the Emperor, praying his Majesty to interfere on behalf of the Pope's independence; but the reply of the Prime Minister was to the effect that there was no intention to depart from the policy hitherto pureued. Mr Childers, who is on a visit to Vienna, was present at a dioner given in his honor by the United States Minister in that city. The trial of Bonton, Park and others for publications are presented after the personating woman, was concluded after

THE STANDARD LIFE ASSURANCE COMPANY,

ESTABISHED 1825 CONSTITUTED BY SPECIAL ACTS OF PARLIAMENT.

ANNUAL PEPORT, 1871.

THE FORTY-FIRTH ANNUAL GENERAL MEETING OF THE STANDARD LIFE ASSURANCE COMPANY was held at Edinburgh, on Thursday the 20th April, 1871.

H MAXWELL INGLE, ESQ, P C S, in the that

THE BIANAGER submitted to the meeting the Annual Report by the Directors as to the Phoonesis of the

AMOUNT OF ABSUMANCES ACCEPTED during the year 1870 (1936 policies).....£1,181,290 8 10 ARNUAL PREMIUMS On New Policies CLAIMS BY DEATH during the year, exclusive of Bonus Additions ... £333 605 16 4 THE SUBSISTING ASSURANCES at 15th November, 1870, amounted to......£16 691,088 19 2 (Of which £970,269 is was Re-assured with other offices) THE ACCUMULATED FUNIS amounted to upwards of£4,000,000 0 0

THE CHARLEMAN requested particular attention to the Report submitted by the Directors, which was then read and from which the following is an ext act:

"On the pre-out occasion the Board of Directors have not only to give an account of their proceedings during the first fluencial year of the Company's progress, but during the quinquennial period which closed on the 15th November, 1870.

November, 1870.

"The Directors have now much satisfaction in reporting that each year of the quinquennial period has been titionded by that steady and satisfactory progress which has for so long a period marked the operations of the Comnany. They did indeed, at one time, contemplate that their sidvancement might be checked 171st, by the monary disturbances in 1856, and latterly, by the financial difficult es of various hogish assurance offices, which had civen rise to disturb and obstity but will be observed from the following lab, showing the business transacted during the five years that the Company has pursued the colm and even two of its way without being in any degree affected by these disturbing elements.

NEW ASSURANCES EFFECTED FROM 15th NOVEMBER, 1865 to 15th November, 1870

Giving an annual average of new business during the period of £1,142,762 15s 5d, the first and lary years of the period being above the average.

"While the Directors direct attention to these results, as indicative of the industry will want years of the being above the average.

"While the Directors direct attention to these results, as indicative of the industry will want years of the propersis made to the Comman during the period referred to, and from which these assurances were selected, amounting to no less time 17, 151,170 15s 5d, contained in 11,221 proposals, of which 0100 ever accepted, represented by the total of £5,713,813 7s 3d, shown above.

"The company has thus, it must be admitted, been eminently successful in obtaining new business, evincing the esteem in which it is held by the public, but a Repert of this nature would be very incomplete were prominence only even to the £xits as well as the entrances. Detain has claimed its usual percentage of he living and the Company has foldlied the object of its institution by meeting with promptness the claims which were thus made upon list funds.

"The Deaths during the quinquennial period gave rise to the following claims :-

£1,591 732 0 10 £220 476 1 8

"In transacting all this businers, the Directors have to the best of their ability. directarged the responsible duties devolved on them. It can well be imagined that in the sequisition of so much new houses, in the draining with so many accumulated transactions and in the settlement if such a large amount of claims, questions of rapping and provide the transactions and in the settlement if such a large amount of claims, questions of the property of the control of the Company as it purved its way. The irectors may at any other time reter to the salves provided the such has attended the management in these respects is that so little had been heard of the Company as it purved its way. The irectors may at any other time reter to the salvescene position which that company has always taken up in liberalising the conditions of the Assurance Contract which has greatly fad that did little properties, but at present they will confine themselves to the simple duy drepering propers.

The Directors nave only further on this occasion to refer to the Investigation with reference to to the Fighth Company's position have very nearly been completed, but the results have not been prized before them by the Actuary, to that they can make not attended that a low seeks hence the whole will be reported in the most complete manner. These remarks apply to the actuarity ir ulis which them the limbilities of the Company.—The investigation of the other side of the account, namely, the assets, has already been completed and a most ratisfactory keport made by a Committee of Directors was unanimously approved of; and after the election of new Directors and a vote of thanks to the Office-Bearers, the Meeting separated.

THE TICHBORNE CASE .- A case is going on in the Court of Common Pleas, London, which promises to be a cause celebre. The plaintiff is Sir Riedard Tichborne, son of the last baronet and owner of the Tichborne estates, worth, it is said, nearly £30.000 s year; that at 25 years of age he lett home, partly because somewhat eccontric manners subjected him to the ridicule of his brother officers. He went to South America and wandered for years. Upon his return he found his estates in the hands of trustees for his consio, an infant. His mother recognized him at once, as did many old triends, and he will endeavor to prove a knowledge of the will deposited with his attorney. Mr Gosford, All manner of evidence as to body marks, etc., will be adduced, and there will be some ourious evidence as to the possibility of forwhich promises to be a cause celebre. The etc, will be adduced, and there will be some ourious evidence as to the possibility of forgetting a language. He ought to have known French, but does not. The theory of the defendants, on the other hand, is that the claimant is an impostor, named Arthur Orton and son of a pork butcher at Wapping—and they will try to set up their own case as well as destroy, his, The trial is expected to last for weeks, and great efforts have been made to summon a high-class jury, which, after Lord Chief Justice Bavill had threatened to fine recusants £500 each, was accomplished. fine recusants £500 each, was accomplished.

GOVERNMENT TELEGRAPHY .- The experiment in England of placing the Telegraph lines under Government control has proved very good deal of opposition, and did not promise very well. Half a million sterling has been added to the revenue from this source during the last year, notwithstanding that the cost of telegraphing has been much reduced. There has been an increase of accommodation, which saves time to the public; and several hundred offices have been opened in the centres of busicess, instead of the Telegraph being confined to the railway station; the multiplication of messages has been immense. During the night, we are told, the wires are rented to newspapers, and the work is better performed than under the old management. Numerous private companies formerly controlled the Telegraph, each with its seperate staff, &c., necessitating a high tariff. But the Telegraph, like the Post Office, is one of the few things that can be managed cheaper and better by Government than by private companies, and the success which has crowned the experiment in England will commend it to other countries, including Canada. successful, though at first it encountered a

The San Juan Question. DISCOVERY of COL. FREMONT'S MAP

We briefly announced on Sanday the finding of an American map at the office of the Colonial Secretary of this Colony, which decolonial Secretary of this Colony, which defines the Boundary line between the United States and the British Possessions, and marks out with the distinctness of black dotted lines and green ink the islands claimed by the British and American Governments respectively. The map is the same as that alluded to by the Earl of Landerdale a few weeks ago in the House of Lords of which it was said

FEW COPIES ARE NOW EXTANT.

All that the United States Governmen could get hold of have been called in and could get hold of have been called in and destroyed, In overhauling a lot of old papers at the Colonial Scoretary's office on Saturday the map was found. Its importance may be estimated when we state that the map is an authorized edition. The following inscription appears on the lower left hand corner:

MAP of

OREGON AND UPPER CALIFORNIA, From the Survey of
John Charles Fremont and other author

DIAN CHARLES FERMONT AND OTHER AUTHORTITES,

Drawn by thuries Preuss,

Under the ORDER of the Senate of the
United States,

Washington City, 1848.
Lithographed by Weber & Co., Baltimore.
The 49th parallel is distinctly and plainly marked out, as we have stated, and the
line is drawn to the centre of the Golf of Georgia, thence souther, y passing between Lummi and Oross Islands, thence to Sinclair Island, where it passes between Cypress and Geomes Islands to Smith or Blunt Island. land, thence down through the centre of the Straits of Fuca to the ocean, This line gives THE BRITISH MORE THAN THEY CLAIM!

It gives them—in addition to San Juan and other important Islands—Smith or Blunt Island—on which the US Government have Island—on which the US Government have erected and maintain a lighthouse—together with several other small islands to which use claim has yet been preferred, but which, we suppose, it will now be found necessary to include in our demands. Col Fremout was a son-in-law of Col Benton, and was sent overland to the Pacific in order to use the value of this and the adjacent sent overland to the Facilic in order to secretain the value of this and the adjacent territory of Oregon and Oalitornia. Col Benton was then a leading Senutor of the United States and, acting upon the information furnished by Col Fremont, the Senutor declared all the country lying north of 49° to be worthless—

THE DERELICT OF NATIONS

Previous to this the Democracic Party had elected Mr Polk President with the cry of 54 40 or fight. That is, they demanded the territory on the Pacific Coast to 54 40, and threatened if their claim was disputed declare war against England. The report of Cal Remark convinced the people that the Col Fremout convinced the people that the

COUNTRY WAS NOT WORTH FIGHTING FOR, and the Americans concluded a treaty with Great Britain on the basis of the elmost forgotten map which has been just exhumed from its musty depository and which is destined to play an important part in the arbitration by the Emperor of Germany.

'Office- Mengers.'-In an article occupying one-third of a column in a local print the terms tffice-mongers at doffice-seekers occurnine times. The ostensible editor of the print referred to has long been in the habit of applying these and eimilar terms to our Even were there good ground for the taunt, which there assuredly is not, it would come with singular ill grace from one who has contessedly spent the last decade of his life in an abortive attempt to gain office, and whose dolorous complaint at the very last session of the Legislature was that he had been engaged these ten years in beating the bush while others caught the bird'. who openly announced as his political motto To the victors belong the spoils'—who is not only breaking his neck after office, now, but is making a convulsive attempt to gain following by the most extravagant and ludi-erous promises of patronage in the division of those epoils' he is vain enough to think fall into his eager grasp! A pretty leilow, truly, to prate about office mongers!

THE READING QUALIFICATION .- As was to have been expected, that provision in the new Act which disfranchises all who cannot read, no matter what their other claims to have a voice in the management of the affairs of the country may be, has occasioned no little dissatisfaction in some of the Electorial disdissatisfaction to some of the Electrical trices. While the Bill was before the Legislature this provision was strongly opposed in these columns, as calculated to do grevious wrong to many good British subjects by distranchising them for what was their misfortune, not their fault. The member for Victoria District, both in the Legislature and through his organ, advocated this resulting a highly recovered desires. provision as being a highly proper and desirable one. Now, he turns round and admits it is a hardship and that its operations are practically unjust !
